Flooring & Soft Furnishings

- Carpet & Curtain Manager
- Floor Estimate Pro
- EziSample
- ASP Services

Carpet & Curtain Manager

A complete management system for the flooring & soft furnishings industries. Track prospects and customers from their initial sample choice & issue, through measure & quote, product purchase & installation to invoicing and beyond.

Full back office integration including stock control, job costing, cashbook and general ledger ensures your financials are live and accurate — all at the touch of a button.

Integrate your Supplier price books using Excel to ensure up-to-date product ranges & pricing.

Our software is written in New Zealand for New Zealanders. We are passionate about development and determined to keep our software "cutting edge".

Because Carpet & Curtain Manager looks after the "nuts and bolts" of your business ,you will have more time to concentrate on developing your business to it's full potential.

MeasureSquare

A streamlined take-off & estimating program that's fast, accurate and professional.
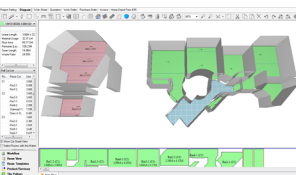

Dimensions can be inputted electronically using a Bluetooth laser measurer — say goodbye to missed walls or unreadable measurements!

Squares, angles polygons or arcs can be drawn accurately and with ease.

Builder's blueprints and plans can be scanned, scaled and quantified in a matter of minutes — no matter how complex the plan.

Carpet, vinyl, ceramics or wood, square or lineal metres all quantified optimally and quickly.

Less time, less waste — measure once and measure right with MeasureSquare..

EziSample

Tired of loosing valuable samples? Finally there is a program to keep track of your property and your potential customers.
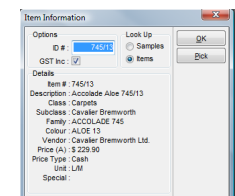

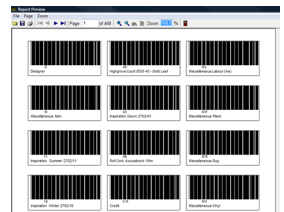

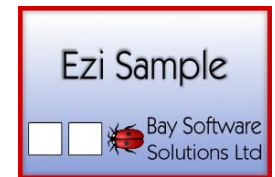

EziSample allows you to create barcodes for your samples and then issue them using a hand held barcode scanner. It keeps track of the number days they've been out, when they're due back, which salesperson issued them and who's got what.

Returning samples is simple — just scan them back in with the hand held scanner. EziSample will know who took them out and return them back for re-issue — no need to go hunting high and low for that Appro book!

Print your Appro Docket with or without pricing and show any current promotional pricing.

EziSample can also be used as a price enquiry point by simply scanning the sample.

It's so simple it's a wonder no-one has thought of it before.

ASP (Application Service Provider) Services

The largest stumbling block with any new IT venture is the cost of setting up the environment. As if the hardware purchase isn't expensive enough, it pales into insignificance against the labour cost to configuration it all and to get it working. Then there's the software licensing, firewalls and anti virus protection. That's before you consider email and SPAM — and how to control your staff on the internet!

If you join us, all you will need to do is to plug your computer into an internet connection and you are ready to go! We look after all software requirements, backups, and security. All this for a price around the standard service fee most IT companies charge to look after that depreciating asset you would have otherwise purchased!
